ONE BRAND. TWO SYSTEMS.
MAXIMUM FLEXIBILITY!

ONE BRAND. TWO SYSTEMS. MAXIMUM FLEXIBILITY!

Perfect paint finishes start with the right system. That is why **ONYX** offers two innovative paint preparation systems designed to meet different application methods and requirements. With **ONYX**, you choose uncompromising quality, maximum precision, and professional performance.

SOLID CUP

The rigid paint cup system with an innovative vent valve combines a robust multi-purpose design with outstanding functionality. It ensures reliable material flow, fast and convenient handling, and a simple, efficient cleaning process.

Designed for professional refinishing applications, this high-performance system delivers exceptional ease of use and maximum process reliability.

FLEX LINER

The flexible liner system combines outstanding versatility with maximum efficiency. The disposable liner enables spraying in virtually any position while supporting a clean, efficient, and material-saving workflow.

By significantly reducing cleaning time and minimizing material consumption, professional refinishers save both time and cost – without compromising on quality or precision.

Discover the benefits of the **ONYX PAINT PREPARATION SYSTEM** and increase productivity while enhancing the quality and consistency of your daily refinishing operations across a wide range of applications.

SOLID CUP

SnapVent

The **innovative vent valve** ensures continuous air ventilation while maintaining a consistent material flow throughout the entire spraying process. This provides the foundation for outstanding colour consistency and a smooth, high-quality finish.
